Frontend / Full Stack Developer with 6+ years of experience building scalable web applications using React, TypeScript, and modern JavaScript frameworks. Proven track record of improving application performance, building reusable UI components, and delivering responsive, user-centric interfaces. Experience across frontend, backend (Java, Flask, Node, Express) and AI-driven solutions.

SKILLS

- **Frontend:** Bootstrap, CSS3, Formik, HTML5, JavaScript, Material UI, React, Redux, SASS, SCSS, Tailwind, TypeScript, Zustand
- **Backend:** Express.js, Flask, Java, Node.js, Python, Spring (basic)
- **APIs:** API Integration, GraphQL, REST API Development
- **Tools:** Adobe XD, Babel, Expo, Figma, Git, Light House, React Dev Tools, Vite, Webpack
- **Databases:** MySQL, PostgreSQL
- **AI/ML:** CNN, NLP, RandomForest, SHAP, XGBoost
- **Auth & Security:** Clerk, OAuth 2.0, Okta, Rate Limiting
- **Other:** Debugging, Performance Optimization, Unit Testing
- **Practices:** Agile Development, Performance Optimization, Responsive Design, State Management

WORK EXPERIENCE

One Sky Collective

04/2026 - Present

Software Developer - Volunteer(Remote) • Internship

- Working on upscaling the project in Next js and integrating the llm techniques in the portal
- Collaborating with backend developer for API integration and documentation.
- Integrating test cases using Jest and Test library while creating a standard for test cases and documentation.

OCR services(Descartes System Group)

Gurugram • 05/2023 - 01/2025

• World Compliance Technologies is an OCR company which was later acquired by Descartes System Group.
<https://www.descartes.com/resources/news/descartes-acquires-ocr>

Software Developer • Full-time

- Developed scalable frontend applications using React and Zustand, reducing component rerenders by 25% and improving UI performance
- Built and maintained backend services in Java, improving API response time by 20–30%
- Collaborated with designers to translate UI/UX designs into responsive interfaces,improving usability and consistency
- Created reusable UI components, reducing development time for new features
- Containerized backend services using Docker for consistent environments
- Implemented CI/CD pipeline using GitHub Actions to automate build and deployment

Software Engineer • Full-time

- Developed dynamic user portals using React and TypeScript,improving user interaction and feature delivery efficiency
- Implemented UI components using Material UI, SCSS, and Formik, improving form handling and validation
- Enhanced application performance and interactivity, reducing page load time by ~30% and improving user engagement

Synoriq

Jaipur • 07/2021 - 05/2023

Software Engineer • Full-time

- Built responsive web applications using React and Redux, improving cross-device compatibility and user retention
- Integrated Okta authentication using OAuth 2.0, reducing unauthorized access risks and improving login reliability
- Developed modular UI components, improving code maintainability and scalability
- Integrated Chatbot for UpstackAi using Vertex AI Agent Builder

GlobalLogic

Gurugram • 02/2020 - 07/2021

Software Developer • Full-time

- Developed interactive UI dashboards using React and Tailwind CSS
- Analyzed large datasets using SQL and Python, processing 100k+ records to generate actionable insights
- Used Google Analytics and scripting tools to track and optimize user behavior

Innodea Innovation pvt Ltd

Pune • 09/2018 - 02/2020

Software Developer • Full-time

- Built web applications using JavaScript, HTML, CSS, and Python Flask
- Developed AI-based features using OpenCV, NumPy, and Pandas, improving detection accuracy by ~15–20%
- Designed UI/UX flows using Adobe XD to improve product usability

PROJECTS

Multi-Scale Hybrid CNN–EfficientNet Framework

- Built a multi model framework for disease detection using radiographic images to manage the manual radiograph interpretation.
- Preprocessed the data using OpenCV(CV2), pandas and Label Encoded using sklearn(scikit-learn) for CNN and EfficientNet model.
- Implemented 3 hidden conv2D layers and adjusted weights of EfficientNet using ImageNet dataset and keeping sigmoid threshold at 0.5 for better results.
- Integrated different plots to compare the models and Grad-Cam for evaluating the model visualization area.

Mobile Bill Splitting Application (React Native, Express.js, Node.js, REST APIs, Authentication)

- Engineered a responsive and intuitive full-stack mobile application using React Native to manage shared expenses, enabling users to split bills, track balances, and manage group transactions in real time
- Designed and implemented RESTful APIs using Express.js for handling transactions and optimized expense calculation algorithms, improving processing performance by ~25% for multi-user group scenarios.
- Integrated secure authentication and authorization via Clerk and Implemented API rate limiting using redis from upstash to mitigate abuse, for user data protection and improve backend stability under concurrent request loads.

AI Chatbot Application

- Developed an AI-powered chatbot using NLP techniques, handling real-time user queries with sub-second response time.
- Built interactive frontend using React, improving user engagement and conversation flow and Integrated backend APIs for dynamic response handling and scalable interactions.
- Live: <https://chatgem-orpin.vercel.app/>

EDUCATION

Master in Artificial Intelligence

University of ulster

Northern ireland, UK • 01/2025 - 05/2026

Bachelor in technology(B.Tech) in Information Technology

Kurukshetra University

India
